**Subject:** RE: Permissions for pollinators book  
**Attachments:** Johansen et al 1983.pdf

Hi Dave,

Here is a copy of "Pesticides and Bees" by Johansen et al in 1983 (Environmental Entomology) that was used as a reference during the SETAC Pellston.

If this isn't the publication that Mimi is referring to, then send me a bit more information about the figures that were cited and I will try to track it down. I am familiar with some of my Dad's publications, and I'm pretty sure there is an index of them at home.

Take care,

**Erik W. Johansen**

Eric,

Can you supply the full citation to Mimi of Johansen et al. 1986.

Thanks,

Dave

**Subject:** Permissions for pollinators book

Dear Tom and Dave,

Forgive me if I was not clear with you about permissions that we need for the pollinators book. I have the ones that Tom sent with regard to the images, but we will also need permission for those figures or tables that have been previously published. Here goes:

Figures 8-1, 8-2, 8-3 are attributed to Johansen et al. 1986...but there is no accompanying reference. So, we'll need the complete reference listing as well as permission to reuse those figures. We may very well be able to obtain the permissions online, but we first need the source.

Figure 11-1 is attributed to Wang M, Grimm V (2007) Home range dynamics and population regulation: an individual-based model of the common shrew. *Ecological Modelling* 205: 397-409. Permission through RightsLink will cost \$44.85.

Figure 11-2 is attributed to Wang and Grimm 2010 in ET&C, so no problem there. We will give Wiley the permission statement to include.

Figure 11-3 is attributed to Schmolke, A., P. Thorbek, D. L. DeAngelis, and V. Grimm. 2010b. Ecological modelling supporting environmental decision making: a strategy for the future. *Trends in Ecology & Evolution* 25:479-486. Permission through RightsLink will cost \$44.85.

Figure 11-4 is attributed to Martin, S. J. 2001. The role of Varroa and viral pathogens in the collapse of honeybee colonies: a modelling approach. *Journal of Applied Ecology* 38:1082-1093. Permission through RightsLink will cost \$276.00. *(Jen, this is a Wiley-published journal. Dont' know whether that makes a difference.)*

Table 10-4 is attributed to a SETAC book, so not problem there. We will give Wiley the permission statement to include.

If this information is not accurate, please let me know. As well, please confirm that all the other figures and tables are original and not reprinted from a previous publication. Don't worry about the permission grant fees; we will take care of those, but we just needed to confirm that all of the above is accurate before we purchase the rights.

Thanks!  
Mimi and Jen

There's still time to submit your abstract for the SETAC North America 34th Annual Meeting. <http://nashville.setac.org>.

The Society of Environmental Toxicology and Chemistry (SETAC) is a not-for-profit, worldwide professional organization comprised of individuals and institutions dedicated to the study, analysis and solution of environmental problems, the management and regulation of natural resources, research and development and environmental education. Our mission is to support the development of principles and practices for protection, enhancement and management of sustainable environmental quality and ecosystem integrity.
